

WHAT IF IT'S NOT ASTHMA? WHAT IF IT'S IPF?

Learn more about IPF
misdiagnosis at BreathlessIPF.com.

Idiopathic pulmonary fibrosis (IPF) is a serious lung disease that kills around 40,000 people each year, yet it's virtually unknown. And its symptoms—like shortness of breath; a dry, hacking cough; and fatigue—are common, making misdiagnosis easy.

Visit BreathlessIPF.com to learn more about IPF misdiagnosis.
