

A close-up photograph of a woman with long, dark hair coughing into her right elbow. The image is slightly blurred and has a dark, semi-transparent overlay. The text is overlaid on this image.

WHAT IF IT'S NOT JUST A COUGH?

WHAT IF IT'S IPF?

Visit BreathlessIPF.com to learn more about IPF and its symptoms.

Idiopathic pulmonary fibrosis (IPF) is a serious lung disease that claims as many lives each year as breast cancer, yet it's virtually unknown. And its symptoms—like shortness of breath; a dry, hacking cough; and fatigue—are common, making misdiagnosis easy.
